## Track all details of equipment and products installed at your customers' facilities by make and model

ASC's Equipment & Warranty Tracking is a stand-alone module complementing Acumatica's Distribution & Manufacturing Suites, and the ASC FlexMFG module. Equipment & Warranty Tracking represents a cost-effective alternative to Acumatica's Equipment Maintenance and is not dependent upon the Service Series module.

**BETTER INFORMATION – A SINGLE, REAL-TIME VERSION OF THE TRUTH...**

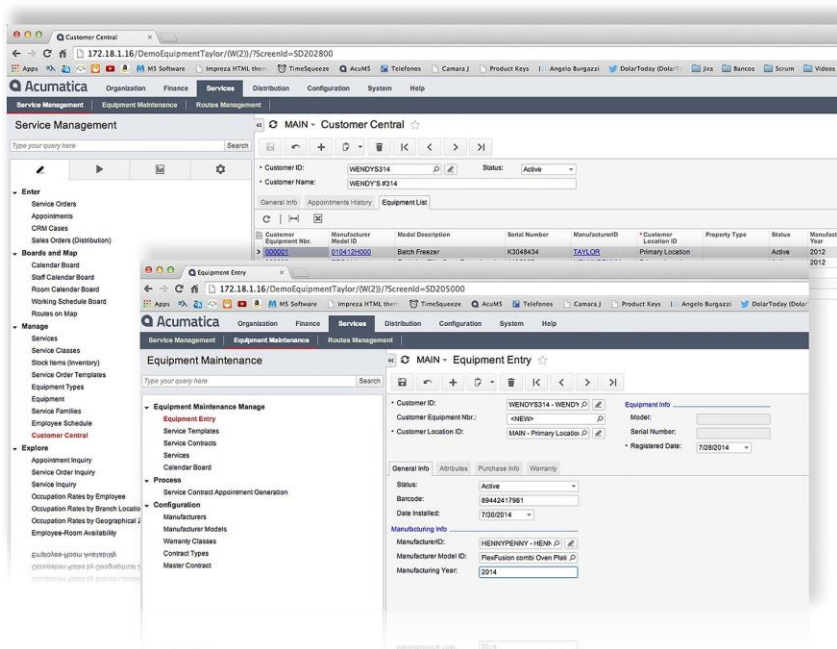

### KEY BENEFITS

#### BETTER INFORMATION

- Track and manage every detail of equipment shipped to your customers
- Tracks the installed Bill of Material and its serial number

#### A SINGLE, REAL-TIME VERSION OF THE TRUTH

- Equipment & Warranty Tracking is your connection between order management, projects, CRM and inventory management, providing all the required information to track shipped equipment
- Better business insights and decisions result from the combination of automated processes, accurate data collection and financial analyses

*Tracks the installed Bill of Material and its serial number*

**Equipment maintenance inventory** – Maintain all details of equipment and products installed at your customers' facilities by make and model and serial number.

**Warranty tracking** – Track equipment warranty (to prevent needless customer invoicing parts and labor when the work is covered under warranty).

**Link to RMA Order** – Returns are per RMA order with costs to repair captured within Equipment & Warranty Tracking. Product disposition is updated in Equipment & Warranty Tracking upon repair. If out of warranty customer is billed.

**In the cloud and mobile** – Built 100% in the Acumatica Framework. All applications are web-based, giving users with appropriate privileges unlimited access to the system from anywhere in the world.

## EQUIPMENT & WARRANTY TRACKING FEATURES AND CAPABILITIES

<b>“As Delivered” Database</b>	Tracks as Built/Delivered BOM(s) with updates to equipment in case of repairs or upgrades
<b>Service Template</b>	Create list of installations. Maintain installed equipment, serial number, and warranty.
<b>Warranty Management</b>	Establish warranties specifying the specific items under warranty to avoid confusion, mischarges, and objections. Warranties can be mixed -- for instance, a two-year warranty on part A and a one-year warranty on part B.
<b>Invoicing</b>	Capture and invoice for all parts and labor related to the repairs rendered. Can also charge parts and labor (as non-stock item) exclusively on Sales Order.
<b>ADAPTABLE CLOUD</b>	All applications are created for the cloud, which means that users with appropriate privileges can access the information from any device with a web browser or on native mobile apps.
<b>DEPLOYMENT OPTIONS</b>	Acumatica can be installed in-house or in a private or public cloud of your choice. Your deployment and pricing options are designed to ensure mid-market success.
<b>CONNECTED CLOUD</b>	Built for your business and can grow with your needs. Add capabilities such as CRM and data visualization. The flexible architecture allows for customization without the need for coding.
<b>EASE OF USE</b>	Staff and customers can collaborate easily and efficiently on Mac, PC, tablet, or phone. Use the built-in User Guide for self- paced learning as roles and requirements evolve.

### ABOUT ADVANCED SOLUTIONS & CONSULTING CO.

Advanced Solutions & Consulting Co. (ASC) is a founding Acumatica VAR with MVP status. We deliver ISV solutions that save serious time and money for supply chain and accounting applications. Our solutions are written in native Acumatica xRP. They address complex ERP requirements extending Acumatica’s market breadth and competitiveness.

ASC augments Acumatica with elegant solutions that monitor and automate ERP functions to improve Acumatica’s competitive landscape and save customers (and their VAR’s) serious time and money.
